

Training for Stock & Futures Trading with Independent Trader & Certified Coach: Mark Petroff

Unique Features:

- 3 days of one-on-one practical step-by-step training, on location at your home or office.
- Taught by 30-year active and successful Trader & Coach.
- Solely designed to quickly elevate your skills and success as a trader and/or investor.
- No products or product systems will be offered, sold, or included in the Training or any time thereafter.

Day 1:

1. **Trading Plan:** Co-design your custom plan with vital points to feel safe and clear before each trade.
2. **Reward-Risk-Ratios & Risk Management:** Time tested ways to reduce & manage risk & improve gains.
3. **Charting Techniques, Base Lengths, & Successful Patterns:** You might have noticed that horizontal lines are not making you consistently profitable. Mark will show you what can, in any market.
4. **Indicators: Trends & Timeframes, Volume Signals, Moving Averages, Relative Strength, Market Internals: Advance/Decline, TICK & TRIN, Futures, VIX, Industry Group Leaders:** What works and what no longer works. Why a revolutionary understanding of Timeframes is the only indicator you really need.
5. **Candlesticks: Direction, Expansion, Momentum Shift, 50% & 20% Rules:** Mark makes them friendly & easy. There are two particular candles, that when coupled with a unique price action condition, can boost wins.
6. **Price Action:** The only non-lagging indicator of what is happening and likely to happen. The only thing that ultimately matters, taught in a way that will simply and rock your world in a positive way. Probably 95% of market participants use lagging indicators, and more than 90% of them lose. Price action, when understood in a way you've likely never seen or heard anywhere, is never wrong.

Day 2:

7. **Learn to Avoid & Manage the Most Common Emotional Pitfalls:** Having to be right, fear of being wrong, looking bad, greed, indecision, inflated pride, rejection & isolation, and emotional exhaustion.
8. **Intraday Reversal Times & Broader Cycles:** You'll know how to expect typical intraday, weekly, monthly, quarterly, annual, lunar, and other cyclical events, before they happen.
9. **Market Phases & Distribution Signals:** You'll be able to look at any chart in any market and know if it's in doldrums, or statistically ready to fall apart or blast off!
10. **Balance Sheet Analysis:** Imagine being able to review most balance sheets in a few minutes to decide if a stock belongs in your favorite watch list or a virtual trash can.
11. **Stock Screening Course:** It has taken Mark almost 3 decades to find what works best. You'll learn to save considerable time, energy, and money in your own research. You'll also learn profitable specifics about such variables as: Earnings & Revenue Growth, Price-to-Sales Ratio, Float, Institutional Support, Up/Down Ratio, Debt, Return-on-Equity, Cash Flow, Book Value, Current Ratio, Margin, Enterprise Value, and P/E Ratio.

Day 3:

12. **Swing Trading:** Where the big money is made by those who use the principles wisely.
13. **Futures Trading:** Instead of guessing or gambling, you'll know how to put the odds in your favor when you trade, and when not to trade.
14. **Summary & Q& A:** Makes all of the above as simple and clear as possible.
15. **Optional Live Trading for Profit!** At your option, you can choose to have the benefit of Mark's live feedback before and during your live trades.

Background:

Mark has actively traded stocks, options & futures for income since 1987, and is currently a full-time Trader. He is also a Certified Coach for traders, executives and individuals worldwide, and formerly a Coach at Robbins Research International (an Anthony Robbins company). Mark has successfully coached traders domestically and internationally for over ten years. After struggling to break even during his first 15 years as a trader, and making & "spending" several million dollars in "Wall Street tuition" and courses, Mark deeply learned the importance of the disciplines above, and since has had double and triple-digit annual returns. His long road of experience and costly hands-on education are shared in this training with those who have a strong desire to prosper in the markets.
